

## NECO COUPLINGS

### PRODUCT BULLETIN

### 8" CAM-LOCK COUPLINGS

#### *Interchangability with other brands*

The mil-spec standards do not apply to 8" cam-lock couplings. There are two major styles in today's market and the two styles do not interchange. The original style is the Ever-Tite standard. The second style is manufactured to the P-T standard. The Ever-Tite standard is physically larger and will not interchange with the #2 style. NECO 8" couplings are manufactured to the Ever-Tite standard.

#### Original Style

Ever-Tite  
Andrews  
NECO

8" A

8" C

Original Style

#### #2 Style

P-T  
KOA

8" A

8" C

#2 Style

The quickest way to check the style of your existing couplings is to measure the machined diameter of the adapter. If the adapter is larger than 9" O.D., then you have the Original style. If the diameter is less than 9" O.D., then you have the #2 style.
